Allowances to Sheristadar Cocanada (Cocanada Division) Pattasi Taluk. Sullia road Kodkada Srikaw. inclusion of Office passed - G.O. Communicate

D.Dis.No.4604/36. South Kanara Collector's Office,
Mangalore, 24th December 1936.

From

A. D. Crombie, Esq., C.I.E., I.C.S.,
Collector of South Kanara.

To

The Secretary to the
Board of Revenue,
M a d r a s.

Sir,

Allowances - Unhealthy localities - South Kanara District Puttur Taluk - villages of Sullia and Kokkada firkas - Inclusion in the list of unhealthy localities.

I find from Rule 10 of the Madras Manual of Special Pay and Allowances, that only a few of the villages of this District bordering on the ghats have been declared as unhealthy localities for the grant of special pay to Government servants for service in these villages. There are however many other villages of the Puttur Taluk which ought to be similarly treated as unhealthy localities. The majority of the villages forming the Revenue Inspectors' firkas of Sullia and Kokkada of that taluk are of this type. My predecessor, Mr. Humayun, during a camp at Sullia found that there had been no Revenue Inspector for the firka for some time, and called for a detailed report from the Tahsildar of Puttur.

2. The Tahsildar and also the Revenue Divisional Officer, Puttur report that the two firkas are extremely unhealthy and that most of the villages of these firkas are so malarious that no Revenue Inspector is able to continue there for a full period of three years. I enclose herein a statement giving an analysis of the periods in which the Revenue Inspectors stayed in these firkas since 1933 and the periods in which there was actually no Revenue Inspector working in them. It certainly seems to ------

substantiate the claim.

3. The District Health Officer is also of opinion that the two firkas are very malarious and states that the Special Malaria Officer, Madras who investigated the Malaria problem in Puttur Taluk in the year 1928 came to that conclusion. The statistics furnished by him show that during a period of 2 years, 22,317 patients were treated for Malaria with 19,342 packets of quinine in Puttur Taluk, of which 10,469 patients (i.e., 47% of the total) and 7,791 packets of quinine (i.e., 40% of the total) belonged to Sullia and Kokkada firkas. These figures, I submit, show the widespread prevalence of Malaria in the two firkas and I think there is a strong case for including all the villages in the two firkas in the list of unhealthy tracts for the grant of special allowances under Rule 10 referred to above. I recommend that the Board will be pleased to move the Government accordingly.

BOARD OF REVENUE 27 AUG 1937
GOVERNMENT OF MADRAS 1 SEP 1937

Revenue and Public Health department.

Memorandum No. 13183-1 El P.H. dated 25th A u g u s t 1937.

Allowance - Unhealthy localities - (South Kanara) - Sullia and Kokkada firkas - Inclusion in the list.

.....

In connection with the proposal of the Collector of South Kanara to include in the list of unhealthy localities the Revenue Inspectors' firkas of Sullia and Kokkada the Director of Public Health suggested that, instead of granting special pay by including the firkas in the list of unhealthy tracts, it would be desirable to give relief measures in the form of a free supply of (1) mosquito nets, (2) drugs and (3) Mosquito repellents to the Government servants, their families and their dependants. It is however considered that the free supply of mosquito nets will be a complicated problem involving enormous cost not only in respect of the original supply but on renewals and supervision. It is therefore proposed to grant only advances for purchase of mosquito nets instead of supplying them at the cost of the State. The Director of Public Health is accordingly requested to work out the cost of the relief measures to be given by the free supply of drugs and mosquito repellents to the Government servants, their families and dependants in the Revenue firkas of Sullia and Kokkada, and to compare it with the cost of the grant of special pay to the staff concerned.

2. For the purpose of calculating the cost of the grant of special pay, the Director of Public Health should take into consideration only the two revenue inspectors' firkas of Sullia and Kokkada. The Health Inspectors doing duty in the two firkas may be asked to make a list of the Government servants employed in the firkas who will become eligible for the unhealthy localities special pay, if the area is included in the list of unhealthy tracts.

3.

13-8-

3. In working out the cost of relief measures to be adopted, the expenditure already incurred on the free distribution of quinine in the two firkas should be taken into account.

BOARD OF REVENUE 17 AUG 1938 MADRAS

EDUCATION AND PUBLIC HEALTH DEPARTMENT

(Public Health)

G.O. No. 2058, 4th June 1938

Malaria—Anti-malarial measures—Sullia and Kokkada firkas (South Kanara district)—Free supply of drugs, mosquito repellants and mosquito nets to Government employees—Sanctioned.

READ—the following papers :—

3 c f.

Reference from the Board of Revenue, No. C. 144-37-1, dated 19th January 1937.

From the Director of Public Health, dated 11th January 1938, No. 34472-Mal.

Order—No. 2058, P.H., dated 4th June 1938.

In its reference read above, the Board of Revenue has recommended the proposal of the Collector of South Kanara that as most of the villages in the Revenue Inspectors' firkas of Sullia and Kokkada in the South Kanara district are malarious and consequently extremely unhealthy, the two firkas may be included in the list of unhealthy tracts for the grant of special pay under rule 10 of Part I of Volume I of the Madras Manual of Special Pay and Allowances.

p 1-2 c f.

2. The Government consider that the mere presence of a certain amount of malaria in a particular tract does not justify the grant of special allowance. They would prefer to introduce permanent anti-malarial measures in those areas, but as this may take some time they accept the proposal of the Director of Public Health that relief may be given in the meanwhile to the Government employees in the areas in the form of a free supply to them, their families and dependents of (i) drugs, (ii) mosquito repellants and (iii) mosquito nets. Accordingly they sanction the free supply of these articles to the staff and their families and dependants in the two firkas referred to above.

The supply of drugs will not involve extra cost to the Government as the firkas are already in the free quinine distribution area and as Government servants and their dependants can get free quinine from the agents. Special instructions should be issued to the Government servants to avail themselves of the free supply of quinine through these agents.

With regard to item (ii), the Director of Public Health has reported that kerosene mixed with castor oil and cocconut oil is the best mixture and that the cost of the mixture is one anna per head per month, and that the cost of the supply of the repellant to the staff and dependants works out to Rs. 262–8–0 per annum. The Government consider that instructions similar to those in paragraph 3 of G.O. No. 1337, Revenue, dated the 26th July 1933, should be issued to the persons using the repellant.

The mosquito nets will be supplied once in two years, and their supply will be subject to the following conditions, viz. :—

(1) that the Government servants receiving the nets are held responsible for keeping them in a good state of repair,

(2) that they should present the nets for inspection by their immediate superiors once in three months.

3. The Director of Public Health should work the scheme outlined in this order in consultation with the district authorities and submit a report to Government on the results achieved at the end of two years.
